What You Can Do:

[Search Data](#)

[Visualize Data](#)

[Analyze Data](#)

Genes

Access integrated information about genes and their protein products, including structural and functional attributes, biological pathway membership, protein-protein interactions and more.

SNPs

Search the ImmPort Single Nucleotide Polymorphism (SNP) database, a collection of NCBI dbSNP, Entrez Gene and HapMap data.

Pathways

Explore the biological pathways associated with particular genes or proteins using pathway information from KEGG. (BioCarta, Reactome, MGI and PID-NCI coming soon.)

Protein Networks

Search the Biomolecular Interaction Network Database (BIND), Reactome and Munich Information Center for Protein Sequences (MIPS) databases for known protein-protein interactions.

MHC Alleles

Find complete DNA and protein sequences, sequence features, and population frequencies of MHC, MIC and TAP alleles. Align MHC sequences to visualize extent of polymorphisms.

ImmPort Gene Lists

View detailed information about immunologically-relevant genes by category. Examine differential gene expression information from immunologically-relevant microarray data sets.

Research Advanced Search

Explore the structured data from DAIT-funded research studies for re-analysis and novel discovery.

Reference Advanced Search

Identify reference data sets based on multiple search parameters.

Notifications

»Doing flow cytometry? Check out FLOCK ImmPort's flow cytometry analysis tool

»NEW! Analyze HLA typing data with ImmPort's Sequence Feature Variant Type (SFVT) analysis tool

»NEW! Download summary tables, pathways, protein-protein interaction networks and GO terms for immunologically relevant genes from the [ImmPort Gene Lists](#)

»Submitting data to ImmPort? We want to help! We're available to assist you in all aspects of data submission, including formatting, validating and uploading your data. Send us an [email](#), and we'll work with you to ensure everything runs smoothly.
