

Improved functionality of Query Results

- In the summary table that displays the search results, you may do a multi-select of results using SHIFT-CLICK

This function is used to select multiple rows in a summary table.

Click on the first and last rows to select the data in a table.

DO NOT click on the checkboxes when doing the selections.

- To do a multi-select of results by using CTRL-SHIFT-CLICK

This function is used to select non-contiguous sets of records in a summary table.

Click results across tables on multiple pages.
